I am a life-long problem solver, solution builder and student, excited by the prospect of a new challenge. I am wanting to expand my knowledge and build more experience in web development technologies such as HTML, CSS, JavaScript, and React. I would relish the challenge of building new web pages and applications to help clients achieve their best.

## SKILLS

---

- Team player
- Communication
- React
- VS Code
- Researching
- Project Management
- HTML5
- CSS3
